EDUCATION

2015 - 2020

Linköping University

M.S. Media Technology & Engineering

The program's main fields are mathematics and programming, with focus on visual programming and web development. The bachelor's project I did together with five other classmates was an Air-Hockey game on a touch table. Some of the master courses that I have attended during my master are:

- Advanced Interaction Design
- Advanced Web Programming
- Artificial Intelligence for Interactive Media
- Image Reproduction and Image Quality
- Information Visualization
- Procedural Methods for Images
- Scientific Visualization
- Structural Methods for User Experience (UX)

PROFESSIONAL EXPERIENCES

June - July 2019

Programming Coach - Linköping, Sweden

Code Summer Camp is a camp where 120 children between the ages of 7-17 are given the opportunity to learn and develop their programming and problem solving skills. As a coach, I was there to support and help the children learn, as well as leading programming workshops. Code Summer Camp is organised by Science Park Mjärdevi and Edvira.

June - August 2018

Application Developer - Linköping, Sweden

The Summer Match via LiU Innovation is a collaboration between researchers and students in various projects. My project was based on collecting results in a creative way. The task was to create a first version of an application that supports risk analysis in an industrial context. The application was developed using React Native.

November 2017 - May 2018

Web Developer - Norrköping, Sweden

I developed a new website for the program of Social and Cultural Analysis at Linköping University. The website was developed using Wordpress via One.com. The goal was that the new website could be easily managed by students lacking web knowledge. The project was personally rewarding and gave me a chance to practice communication between developer and client.
